

SPC Flooring Care and Maintenance

You can protect your flooring by following these easy guidelines.

Cleaning Instructions

Clean the floor routinely to remove dirt and dust by dust mop or vacuum. For a deeper cleaning, use a damp cotton cloth or cloth mop. Always remove sharp objects, stains, moisture or aggressive substances that could scratch the floor.

Important Tips

- Do not pour liquid directly on the floor or use an excessively wet mop that will leave water standing on the floor.
- Do not use steam-based cleaners for SPC flooring.
- Do not use soap-based detergents, as these may leave a dull finish on your floor.
- Do not use abrasive cleaners, steel wool or scouring powder, as these may scratch your floor.
- Do not wax or refinish a SPC flooring.
- Sweep your floor regularly with dust mop.
- Promptly remove all liquid spills, including pet urine.
- Use doormats outside each entrance to your home to prevent dirt, sand and other substances from being tracked onto your floor.
- Close your curtains or blinds where extreme sunlight hits the floor.
- Use felt floor protectors under furniture.
- Keep household vinegar on hand to create a simple cleaning solution (1 cup household vinegar to 1 gallon warm water).

Simple Repair & Stain Removal

The overall stain resistance of our SPC flooring is quite good. And most spills will wipe off quickly and easily with a clean cloth. Removing certain substances may take a little extra effort, as outlined below.

Problem	Procedure
Food, Beverages	Use lukewarm water or a non-abrasive cleaner (like vinegar and water) with a soft cloth or mop.
Candle Wax, Chewing Gum	If a substance is hardened or gummy, remove it with plastic scraper. Clean using clean water and a soft bristle brush.
Marks, Oil, Nail Polish, Paint (oil-based), Cigarette Burns	Use acetone-based nail polish remover on a clean cloth and spot clean.
